

Kanigen Protected Accu-loc® Mounted Ball Bearing Units

Features and Benefits:

- Electro-less Nickel Bearing outer and inner ring
- Stainless Steel Accu-loc® Collar
- Pre-lubricated with an NSF "H1" rated food grade grease.
- Available with most Normal Duty housing styles and popular Inch bore sizes
- Direct Interchangeability.
- Easy to install with a single cap screw
- The special tapered clamp collar design provides a uniform grip of the bearing inner race to the shaft.
- Does not Mar or damage stainless steel shafting.

The Kanigen Accu-loc® Bearing Insert is a problem solver when the goal is to minimize shaft vibration at higher speeds while providing corrosion protection in wet environment conditions.

**New Inch bore sizes including 1-11/16", 1-15/16", 2" and 2-7/16".
