

# Air Movement Bearing Units

Bearing units designed and manufactured to be within special limits specified for the HVAC industry.

## Features

- Available in any cast iron housing and locking style combination
- Anti-Rotation Pins keep the bearing insert from rotating in the housing
- Expansion and non-expansion pillow blocks are available
- Zone hardened inner rings for positive locking on the shaft
- Honed raceways for smooth quiet operation
- High Temperature options up to 450 °F
- Designated with an "AM" suffix on our part numbers
- The aligning torque for each bearing is measured in the housing to be within special limits specified for this industry

## Applications

Exhaust Fans  
Heating Fans  
Blowers  
Heating Equipment  
Cooling Towers  
Exhaust Ventilators
